## Market Time

The average Days On Market (DOM) shows how many days the average Property is on the market before it sells. An upward trend in DOM tends to indicate a move towards more of a Buyer's market, a downward trend a move towards more of a Seller's market. The DOM for April was 151, down 5.0% from 159 days last month and up 25.8% from 120 days in April of last year. The April 2012 DOM was at a mid level compared with April of 2011 and 2010.

## Selling Price per Square Foot

The Selling Price per Square Foot is a great indicator for the direction of Property values. Since Median Sales Price and Average Sales price can be impacted by the 'mix' of high or low end Properties in the market, the selling price per square foot is a more normalized indicator on the direction of Property values. The April 2012 Selling Price per Square Foot of \$110 was down 5.3% from \$116 last month and down 0.5% from 111 in April of last year.

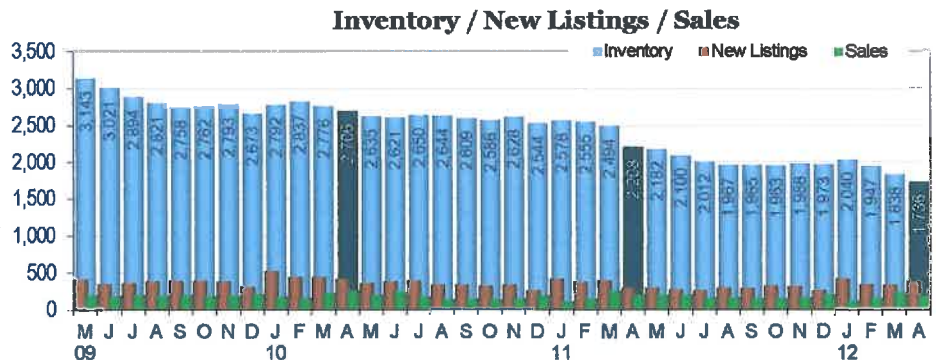

## Selling Price vs Original Listing Price

The Selling Price vs Original Listing Price reveals the average amount that Sellers are agreeing to come down from their original list price. The lower the ratio is below 100% the more of a Buyer's market exists, a ratio at or above 100% indicates more of a Seller's market. The April 2012 Selling Price vs Original List Price of 92.1% was up from 91.9% last month and up from 91.6% in April of last year.
